PRESS RELEASE

NACS – collaboration with academia

The National Agency of Civil Servants (NACS) informs that, in the context of the entry into force of the *Governmental Decision nr. 909/2014 on the approval of Strategy for strengthening the public administration 2014-2020 and the formation of the National Committee for coordinating the implementation of Strategy for strengthening the public administration 2014-2020*, it undertakes a substantial process of documentation and elaboration of some system analyses on the evolution of civil service and reconsideration of some institutional competences in terms of human resources management in the public administration.

To this end, NACS has solicited the support of some partners in the academia (The University of Bucharest, Bucharest Academy of Economic Studies, the National School of Political Science and Public Administration and the Romanian Academy) in the view that the expertise in public administration, the results of specific scientific research activities can be of a real support in this project started at NACS level.

We mention that the results of these analyses will be further used in substantiating of public policies documents to be developed at Agency's level during 2015, namely **The Strategy on civil service 2015-2020** and the **Strategy on professional training 2015-2020**.

“I'm convinced that the rich experience and expertise of the representatives from the academia, to which we collaborated on previous actions, will be very important for the reconfiguration of the system in what concerns the civil service and the training of human resources in administration, given that common purpose of the organizations we represent is to contribute to the development of the Romanian public administration”, was the message of József Birtalan, președintele ANFP.
