Students from the Nicolae Titulescu University having an internship at NACS

Today, sixteen students of the Faculty of International Relations and Administration from Nicolae Titulescu University have passed the threshold of the National Agency of Civil Servants, where they will have an internship for three weeks.

“In the context of correlating learning with the employment market and implementing the civil service strategy 2016-2020, the internship will represent an opportunity for you, to be acquainted with the concrete methods of managing administrative procedures for the civil service. At the same time, you should be aware that the future regulatory framework will require an update of specific courses and manuals of administrative law, with an important volume of sectorial legislation being codified. I wish you capture a professional interest for this issue, good luck in documentation and success in the theoretical and practical activity” was the message of NACS president, Cristian Bitea, on the occasion of the meeting with the students.
